

DIVI DADDY PATRICK HAKIM

Early blockchain pioneer since 2015, Patrick Hakim, is a specialist masternode service provider with deep experience in systems and structure with a "Zero Cooling" mining facility. and was afforded many opportunities to learn. He migrated from mining to Masternodes to take advantage of the lower overheads.

Patrick's strength is taking time to listen to a problem and apply a blockchain solution to create real life value. He's passionate about his family, faith and the freedom that comes with it, and he looks for ways to help network and engage with his local Blockchain community.
